Digital transformation for Biomass Boilers – unlock effectiveness

What is the best digital transformation scenario for biomass boilers?

In this webinar You'll be able to see real examples how new technologies like digital twin, predictive maintenance, big data analytics are applied for more effective biomass boiler control.

We are going to share real example:

- How biomass boiler can produce more heat/steam by using less biomass?
- How to reduce boiler maintenance costs?
- Human errors that can be avoided.
- What KPI should be followed in order to increase boiler efficiency?
- How to know if Your Company is ready for digital transformation?

We will answer these and other relevant questions in the Free Webinar and present **EA-SAS Boiler** and its capabilities.

Date: 2021 January 28th, 10 a.m. EET GMT +2

Duration: 1 hour for presentation, 30 minutes for discussion

Place: Online, more information after registration

Registration: [here](#) or by e-mail: info@energyadvice.it

Organizer: Energy Advice, more at www.energyadvice.it/en

PARTICIPATION IS FREE OF CHARGE!
